

Swarm Aqua® has been installed in:

Yeovil

Swarm Aqua® was used on this mixed purpose site in Yeovil. Alongside Swarm Aqua®, an attenuation tank was also specified and supplied by Swarm.

Having seen Swarm Aqua® on a completed site in St Ives, the client chose Swarm Aqua® for this project for its aesthetic finish and interception capabilities.

Swarm provided the full design for the stormwater system including the attenuation tank, along with the calculations for the surface water runs.

Once discussed with and approved by the contractor, Swarm Aqua® was supplied and installed.

Find out how using Swarm Aqua® can save you time and money, visit:
